sity. The library is to comprise a series of volumes on the history of the various topics of psychological thought from the earliest times, each volume being an independent work, but the whole constituting an encyclopedic 'History of Psychology'—a work never adequately carried out in any language. The arrangements for the volumes of the library—of which there will be twelve or more—are now being perfected, and the publishers expect to make early announcement of certain of the titles, names of writers, etc.

THE following are the spring lecture arrangements at the Royal Institution: Professor Allan Macfadyen, three lectures on the blood and some of its problems; Professor G. H. Darwin, two lectures on the astronomical influence of the tides (the Tyndall lectures); Professor E. J. Garwood, two lectures on the work of ice as a geological agent; Professor Dewar, three lectures on hydrogen: gaseous, liquid and solid; Professor S. H. Vines, two lectures on proteid-digestion in plants; Professor J. A. Fleming, two lectures on electric resonance and wireless telegraphy; Professor Langton Douglas, two lectures on the early art of Siena; Mr. Hamish MacCunn, two lectures on music (with musical illustrations); and Professor Silvanus P.
